SUMMARY

Full Stack Developer since 2022 and Biotechnology Engineer by training. At Seguros Falabella I build the quote, digital acceptance, payment and after-sales flows for Chile, Peru and Colombia with React, Next.js, NestJS, Strapi and TypeScript; I migrated Nuxt/Vue applications to Next.js, optimized legacy applications and take part in architecture decisions. I use AI agents (Claude Code, Codex, OpenCode, Copilot) with Spec-Driven Development and review all their output.

EXPERIENCE

Mid-level Full Stack Developer · Tsoft, for Seguros Falabella 2024 – Present

- Built five applications across the insurance customer journey: regional quote and purchase site, in-store digital acceptance, payment button, customer and agent login, and after-sales platform.
- Migrated Nuxt/Vue applications to Next.js with TypeScript and improved the performance of legacy applications.
- Frontend with Next.js, React, TypeScript and Zustand; Tomaco design system documented in Storybook from Figma.
- Backend with NestJS and hexagonal architecture, MongoDB, and content managed in Strapi 5 (headless CMS).
- Took part in architecture decisions and automated end-to-end testing with Playwright.
- AI-assisted development: custom Claude Code skills, MCP (Tomaco, Figma, Postman, Notion), per-repo context.
